ELECTRICAL ENGINEERING IN JAPAN

VOLUME 110

CONTENTS FOR 1990

Number 1

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

New Separation Method of Complex TSC Curves and Exact Estimation of Carrier Traps—Large Decrease of Escape Frequency Factor, by Fukuzo Yoshida and Shigeyoshi Maeta 1

Electric and Moving Characteristics of dc Kiloampere High-Current Arcs in Atmospheric Air, by Kinya Sunabe and Tsuginori Inaba 9

Microstructure and Electrical Conduction in RuO_2 Thick-Film Resistors, by Osamu Abe, Yoshiaki Taketa, and Miyoshi Haradome 21

Discharge Threshold Process of Low-Pressure Gas with Electron Beam Injection, by Kiyomi Ando and Hiroharu Fujita 31

Influence of Barrier on ac Flashover Strength of Insulator with Back Electrode, by Yoshiaki Yamano, Yuzo Takahashi, and Shigeo Kobayashi 42

Development of a New Electrode System for the Measurement of High-Field Dielectric Properties of Nonpolar Polymeric Insulating Films, by Kazuyuki Tohyama, Tetsuroh Tokoro, Masayuki Nagao, and Masamitsu Kosaki 51

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Conceptual Design Study of 5 GWh Superconducting Magnetic Energy Storage System, by Tsutomu Maekawa, Hiroshi Kuwahara, Toshio Fukatsu, Kyoji Kase, Masatami Iwamoto, Tadatoshi Yamada, and Osamu Ogino 59

A Fast Method for Power System Analysis Using Parallel Processing on Band Matrix-Type Linear Equations, by Tatuya Kitahara, Tsutomu Oyama, and Yasuo Serizawa 69

Study on Three-Dimensional Phenomena of Subsonic Faraday-Type 10-MW MHD Generator, by Motoo Ishikawa and Juro Umoto 79

dc Arc Interruption in High-Pressurized Water, by Yasuo Nagano, Norio Tahara, and Kohzoh Ohsawa 87

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Degradation Defection Methods for Electronic Circuits, by Hiroshi Inujima and Uichi Kichijima 96

Page

PART D

Industrial Applications

Direct Measurement of Field Strength on Surface of Oil in Large Oil Tank by a Telemetering Field-Water, by Norio Murasaki, Mitsuru Matsui, and Koichi Fujibayashi 106
Characteristics of Variable Speed Brushless-Type Double-Frequency Synchronous Generators, by Sakutaro Nonaka and Takemi Kawaguchi 119
A Method for Determining Appropriate Dimensions of Permanent Magnet of HB-Type Stepping Motors, by Toshiharu Takura and Takashi Onuki 129

Number 2

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Effects of AC Field on Streaming Electrification of Solution of a Surfactant in Insulating Liquid, by Hirofumi Shimokawa and Asao Ohashi 1
Measurement of Electric Field Strength in Insulating Oil of a Composite Dielectric of Polypropylene Film and Silicone Oil, by Takashi Maeno, Toshiyuki Kawasaki, and Tatsuo Takada 10
Influence of Snow Density on Conductivity of Snowfall Measured by AC Method, by Kazutoshi Asano, Yoshio Higashiyama, and Hisakazu Matsuda 19
Methods for the Improvement of Electrical Insulation in Vacuum in the Presence of Transverse Magnetic Field, by Masanori Hara, Junya Suehiro, Hidetaka Shigematsu, and Shinsuke Yano 27
Discussion of Impulse Voltage Test and Proposals of New Interpolation Method, by Atsushi Wada, Masao Endo, and Teruya Kouno 36

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Fault Restoration Operation Scheme in Secondary Power Systems Using Case-Based Reasoning, by Kenzo Okuda, Hiroyoshi Watanabe, Katsuhiro Yamazaki, and Takanobu Baba 47
Restoration Guidance System for Trunk Line System, by Shigeru Warashina, Yukio Kojima, and Shizuka Nakamura 60
Architecture of Database Maintenance for Computer Control System of Electric Network, by Mario Uesugi, Hiroshi Kabasawa, Yukio Nakai, and Takao Omata 74
Dissipation Energy of the Metal Oxide Surge Arresters Due to the Switching Voltage of Current-Limiting Fuses in the 20 kV Class Distribution of Electicity, by Masayuki Okazaki, Tsuginori Inaba, and Takehiko Fujita 89
Lightning Surge Characteristics and Protection Methods of Photovoltaic Power Generation System, by Masahide Takahashi, Kensuke Kawasaki, and Takinosuke Matsunobu . . 101

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Rotating Machinery Diagnosis with Acoustic Emission Techniques, by Ichiya Sato . . . 115

PART D

Industrial Applications

DSP-Based Acceleration Control System with Only Position Sensor, by Satoshi Matsuda and Kiyoshi Ohishi 128

Number 3

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Characteristics of AC Breakdown Voltage of High-Voltage Ceramic Condensers, by Hideo Akagami, Hiroshi Saito, and Masashi Sato 1
Phase Angle Analysis of Discharge Magnitude Distribution in a Fine Void, by Keiji Seto, Tairo Ito, Takao Sakai, and Yoshiyasu Ehara 11

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

An Analysis of Dielectric Interrupting Performance of the Puffer-Type GCB, by Hisatoshi Ikeda, Masaru Okamoto, Masayuki Ishikawa, and Satoru Yanabu 27
The Development of Automatic Restorative Operation Applicable to Power System Local Area Dispatching, by Takenori Kasuya, Hiroshi Oda, Hiroshi Inoue, and Shigeru Iizuka 37
An Approximate Model for the Analysis of Synchronous Machines (Part 2), by Junji Tamura and Ikuo Takeda 50

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Construction of Linear Discrete-Time Model-Following Systems Based on Optimal Regulator Techniques, by Akira Kikuta and Yuji Kamiya 60

PART D

Industrial Applications

A Method of Improving Characteristics of General-Purpose Inverter, by Masakatsu Daijyo, Isamu Hosono, Hideyuki Yamada, and Yuzuru Tsunehiro 71
Flaw Detection in Steel Plates by Means of Barkhausen Effect, by Yukio Kagawa and Takenori Nakamura 82
Input Reactive Power and Characteristic Harmonic Currents of Cycloconverter Using Nonsymmetrical Triggering Method, by Haruo Ikeda, Ikuo Kawaguchi, Sigeo Kaga, and Takashige Saito 94
Rotary Inchworm-Type Piezoelectric Actuator, by Kazumasa Ohnishi, Mikio Umeda, Minoru Kurosawa, and Sadayuki Ueha 107
Thrust/Input Power Ratios and Size of Annular Linear Inductor Motor, by Tatsumi Utsumi 115
A Method of Improving the Operating Characteristics of V/f Controlled Induction Motors, by Kunio Koga, Ryuzo Uyeda, and Toshikatsu Sonoda 121
Oscilaltion Frequency in Hybrid Stepping Motors, by Tsutomu Yokozuka, Eiji Baba, Jukichi Shibayama, Hiroyuki Sekiguchi, and Toshio Kobayashi 131

Number 4

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Insulating Characteristics of SF_6 Small Gas Gaps Against Lightning Impulse Voltages, by Masahiro Hanai, Tsuneharu Teranishi, Hitoshi Okubo, and Satoru Yanabu 1

Page

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Characteristics of $(Bi, Sb)_2(Te, Se)_3$-Based Thick-Film Thermoelectric Elements for Power Generation, by Toshitaka Ohta, Takenobu Kajikawa, and Yukinobu Kumashiro 14
Theoretical Studies on Charge and Discharge Characteristics of Redox Flow Battery, by Takuya Homma, Gen Zhao, and Yasuharu Ohsawa 24

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Integrated Thermopile Power Sensor Using μc-Si Thin films, by Setsuo Kodato and Itsuo Sugiura 35
A Procedure for Designing Robust Control of Systems with Bounded Uncertain Parameters, by Koichi Mizukami, Hansheng Wu, and Fumihiro Suzumura 44

PART D

Industrial Applications

DSP-Based High-Precision Torque Control of Permanent Magnet DD (Direct Drive) Motor, by Shingo Kamiya, Masakane Shigyo, Tatsuo Makino, and Nobuyuki Matsui 51
Effect of Interpole on Cogging Torque of Two-Phase Permanent Magnet Motor, by Shigekazu Sakabe, Yukio Shinoda, and Hiroshi Yokoyama 59
High-Accuracy Voltage Sensor Using Magnetic Core, by Toshikatsu Sonoda and Ryuzo Uyeda 68
Decoupled Control of Synchronous Motor and Its Characteristics, by Hidehiko Sugimoto and Toshiyuki Fujii 75
Current Balance of Phase-Controlled Thyristor Converter with Interphase Reactors, by Toshihiko Tanaka, Satoshi Ogasawara, Yasufumi Akagi, and Akira Nabae 83
Gauge Condition of Magnetic Vector Potential and a New Finite Element Formulation for Three-Dimensional Magnetostatic Field Analysis, by Yasushi Kanai, Takeo Abe, Masakazu Sengoku, Taizo Iijima, Masahiro Iizuka, and Koichi Mukasa 92
A Study on the Stabilization of Control Systems for Induction Motor-Driven Rolling Stock, by Akira Kimura and Kiyoshi Nakamura 101
A Method of PWM Power Regenerative Control Using DC Reactor for Voltage-Source-Type Inverter, by Keiji Matsui and Masayuki Konishi 111
Analysis of Rotating Resistance of a Magnet Base, by Yukio Yamamoto, Shigehiro Nishiwaki, Hiroya Suzuki, Hajime Yamada, and Takeo Matsuhashi 122
A Simplified Vector Control System without Speed and Voltage Sensors—Effect of Setting Errors of Control Parameters and Their Compensation, by Toshiaki Okuyama, Noboru Fujimoto, and Hiroshi Fujii 129

Number 5

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Electrical Characteristics of Polyimide LB Ultrathin-Film Condenser, by Masahito Kushida and Taro Hiro 1
Fundamental Operational Characteristics of a Microwave-Heating-Type Plasmajet Using a Resonant Cavity for Space Propulsion, by Hirokazu Tahara, Yoshimasa Tanaka, Masao Abuku, Toshiaki Yasui, Ken-ichi Onoe, and Takao Yoshikawa 12

Page

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Numerical Integration Methods in Long-Term Dynamic Calculations, by Hiroshi Yokoyama and Shinichi Iwamoto 19

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

One-Day-Ahead Load Forecasting via Self-Organization of Model, by Junichi Murata and Setsuo Sagara 31

PART D

Industrial Applications

Generation Method of Switching Patterns of PWM-Controlled Cycloconverter, by Masami Iwasaki, Akio Ishiguro, Shigeru Okuma, Muneaki Ishida, Youngseok Kim, and Koji Iwata 44
Behavior of High-Frequency Cycloconverter Operating in Discontinuous Circulating Mode and a Control Scheme for Its Circulating Current, by Sejin Seong, Mikihiko Matsui and Tadashi Fukao 56
Proposal of a Novel Motion Control Method Based on Acceleration Control, by Yoichi Hori and Toshiyuki Uchida 67
Performance Analysis of Commutatorless DC Motor Speed Control Systems in the Field-Weakening Control Region, by Shoji Nishikata and Masato Yoneda 77
A New Approach to Harmonic Compensation in Power System—A Combined System of Series Active and Shunt Passive Filters, by Fang-Zheng Peng, Hirofumi Akagi and Akira Nabae 88
Vector-Controlled Induction Motors under Feedforward and Feedback Controls, by Susumu Tadakuma, Shigeru Tanaka, Kazutoshi Miura, and Haruo Naito 100
Reduction of Motor Parameter Sensitivity in Vector-Controlled Induction Motor without Shaft Encoder, by Tsugutoshi Ohtani 111
A Combined System of Shunt Passive and Series-Active Filters--Stability and Compensation Characteristics, by Fang-Zheng Peng, Hirofumi Akagai and Akira Nabae 122
Control Schemes and Compensation Characteristics of an Active Filter Connected in Series to a Passive Filter, by Hideaki Fujita, Yasufumi Akagi and Akira Nabae ... 131

Number 6

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Fundamental Nature of Discretization Errors in Three-Dimensional Surface Charge Method, by Yuji Kuno, Ayumi Yagi, and Yoshiki Uchikawa 1
A Method for Obtaining Dielectric Characteristics by Analyzing Residual Voltage, by Sanshiro Yamanaka, Tadashi Fukuda, Takashi Kabeya, Goro Sawa, Masayuki Ieda, Masayuki Ito, and Waichiro Kawakami 11

Page

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Instrumental Determination of Salt Quantity Deposition on Contaminated Insulator by X-ray Fluorescence Method Using a Minisize X-ray Tube, by Kunimasa Nishioka, Yoshio Higashiyama, and Shigemasa Enomoto 21

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Design of Sliding Observer for Estimation of Rotor Flux of Induction Motors, by Somboon Sangwongwanich, Tsuyoshi Yonemoto, Takeshi Furuhashi, and Shigeru Okuma 30
Fault Distinguishability of Diagnosis Systems and Selection of Observation Items, by Takehisa Kohda and Koichi Inoue 43

PART D

Industrial Applications

Design of the Flux Observer-Based Vector Control System of Induction Machines Taking into Consideration Robust Stability, by Yuji Kuno, Ayumi Yagi, and Yoshiki Uchikawa 53
A Waveform Control Method for ac to dc Converters with High-Frequency Transformer Isolation, by Katsuhisa Inagaki, Takeshi Furuhashi, Akio Ishiguro, Muneaki Ishida, and Shigeru Okuma 67
Equivalent Circuit and Output Characteristics of Super-High-Speed Reluctance Generator Taking Iron Losses into Consideration, by Z.Q. Yang and Tadashi Fukao 80
Estimation of Acceleration by an AC Tachogenerator and Its Applications to Control, by Shuichi Shimano, Masaki Shiono, and Kouhei Ohnishi 90
Output Performance Evaluations of Three-Phase Voltage-Fed PWM Inverter for Induction Motor Drives Using Optimum Trapezoidal-Wave Signal, by Mutsuo Nakaoka, Wunzhen Sun, and Yasumasa Ogino 98
A Study of Operating Characteristics of a Two-Phase Servomotor Driven by Inverter, by Yoshitomo Okada, Sakae Shinomiya, Kouji Obayashi, and Kimio Yamashita . . . 109
Experimental Study of Harmonic Magnetic Flux of Small Squirrel-Cage Induction Motor, by Fuminori Ishibashi and Kazuo Kobayashi 118
Analysis of Abnormal Oscillations of a Three-Phase Nonlinear Circuit, by Mutsuo Tadokoro, Fujio Tatsuta, Hiromichi Nagata, and Toshiaki Yamazaki 128

Number 7

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

A Study on a Reasonable Region of Parallel Driving Ceramic Transformers, by Toshihiko Wada and Takeo Saegusa 1
Lithium Primary Battery with High Electrical Potential Using Fluorinated Graphite Fibers of Second-Stage Intercalation, by Morinobu Endo, Jun-ichi Nakamura, and Hidekazu Touhara 13
Development of Silicon Carbide New Ceramics with High Thermal Conductivity and Insulating Resistance, by Morinobu Endo, Yoshinobu Sugihira, Nobuaki Urasato, and Akira Hayashida 22

Page

Estimation of Dielectric Breakdown Voltage When Breakdown Voltage Follows the Three-Parameter Weibull Distribution, by Hideo Hirose 31
Electrode System for Dielectric Property Measurements in a Wide Frequency Range, by Satoshi Nonaka, Akira Kakimoto, and Akihiro Etoh 42

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Stabilization of Hydroelectric Power System with Long Distance Power Transmission by Using Superconducting Magnetic Energy Storage (SMES), by Yasunori Mitani, Kiichiro Tsuji, Yoshishige Murakami, Shigeaki Hayashi, and Yuuko Tanaka 53
Output Characteristics and Work Function Measurement of LaB_6 Thermionic Converter, by Ryuzo Fukuda, Yasuhiro Kasuga, Kazutoshi Hayashi, and Sadaaki Shimizu 63

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Applications of Nematic Liquid Crystals to Electric-Field Sensors, by Susumu Sato and Masahito Kushima 74
One-Chip Integrated Pressure Sensor, by Susumu Sugiyama, Shiro Yamashita, Hirofumi Funabashi, Keiichi Shimaoka, Mitsuharu Takigawa, and Isemi Igarashi 82
Location and Estimation of a Pipeline Leak, by Kajiro Watanabe and Hiroshi Koyama . . 92

PART D

Industrial Applications

Dynamic Characteristics of Linear Induction Motor for Urban Transit Under Constant V/f Drive, by Sakutaro Nonaka, Nobuo Fujii, and Yasunobu Kojima 102
Implementation of Field-Orientation-Type Vector Control System Based on the Densensitized Fast Flux Observer, by Yoichi Hori, Takaji Umeno, and Hiroyuki Suzuki 110
Remote Inspection of Cracked Electric Insulator by Laser Beams, by Keiji Nakamura, Chobei Yamabe, and Kenji Horii 120
